The WiTS Strategy Council (WiSC)

Vital link in the feedback loop between the WiTS Project Team and the WiTS User Community

The voice of the WiTS User Community.

WiSC members assist with determining how WiTS will be built and used by:

- Communicating pain points
- Suggesting/reviewing proposed enhancements
- Assisting in design decisions
- Performing User Acceptance Testing
- Communicating need for additional training and/or enhanced user support

The voice of the WiTS Project Team.

WiSC members help disseminate information about WiTS by providing their organizations with:

- System updates
- Planned changes and enhancements
- Tips/tricks
- General troubleshooting
- HR systems access management
Choosing the right WiSC member to represent your Organization:

- Should use WiTS on a regular and recurring basis
- Should have sufficient experience in HR and in their Branch/Unit/Division to contribute to development and user support efforts in a meaningful way
- Should be open to the opportunity to stretch outside of their regular job duties and be comfortable with ‘systems’
The Strategy Council (WiSC)
